

# Pseudo Code Directory

What is a "Pseudo Code"?

A pseudo code is a "fake" federal apportionment code that allows the State to put "flavors" on "real" federal apportionment codes.

An example would be obligating HBRR flavored 33D on a barrier rail project or seismic retrofit project. The "real" apportionment code, 33D, is also used in the Regional Surface Transportation Program (RSTP). Since we don't want barrier rail or seismic retrofit projects charged to RSTP, we "pseudo" code the barrier rail replacement and seismic obligations using the pseudo codes BRP and BMS respectively. Pseudo codes have been in existence since about 1990.

Management is reviewing the possibility of deleting some of the pseudo codes.

Following is how the system works:

- 1) A project number **prefix** is chosen from the Pseudo Code Directory that correlates to the right program and funds that are available for the project. (**Note: Most projects do not require the use of these special prefixes.** A basic bridge rehab/replacement, RSTP overlay or widen, or CMAQ project do not require pseudo codes.)
- 2) An E76 is processed that uses the above project prefix and "real" apportionment code. The E76 is then accepted by FHWA's system, FMIS, which obligates the federal funds.
- 3) Caltrans then downloads from FMIS into its various systems including LPAMS, the Local Programs Accounting Management System. As part of the download process, LPAMS matches the project prefix and the "real" apportionment code against its pseudo code reference table. If it finds a match, the "real" apportionment code is replaced by the pseudo code. If no match is found, then the "real" federal apportionment code is passed to the accounting system. The critical issue here is that the prefix must exactly match what is shown in this table for the system to work properly.
- 4) When a State-Local Agency agreement (program supplement) is needed, the pseudo code is keyed into the agreement system rather than the "real" federal apportionment codes. This allows the accounting system to ensure that there are appropriately flavored federal funds to back up the State-Local Agency agreement.

For questions about this directory, please contact [Eric\\_Bost@dot.ca.gov](mailto:Eric_Bost@dot.ca.gov)
